**Green Building Rating System for NC & Major Renovations (LEED-NC)
Version 2.1 – POTENTIAL LEED™ POINTS – TapcoSlate composite roof tile**

The Tapco Group supports the use of sustainable construction practices and energy efficient design in all new and remedial construction projects. Tapco Roofing Products, by formulation and design, manufactures its products which supports this effort and contribute toward achieving LEED points according the LEED Green Building Rating System developed by USGBC.

TapcoSlate composite roof tiles contribute to achieving credits in the following categories:

I. Materials and Resources	<u>Potential Contribution</u>
Credit 2.1-2.2	
A. Construction Waste Management – Divert 50%-75% from Landfill	1-2 pts
1. *TapcoSlate roofing panels are 100% recyclable	
Credit 3.1-3.2	
B. Resource Reuse 5%-10%	
1. If product is removed carefully – can be reused	1-2 pts
Credit 5.1-5.2	
D. Local/Regional Materials – 20% manufactured locally	1-2 pts
1. TapcoSlate roofing tiles are made in Southern, Michigan	
2. Defined as any project within 500 miles of plant site	
3. 200 squares/truckload – largest available in the industry – less trucks are needed to deliver product to the jobsite	

Total Potential Contribution minimum 3 pts to maximum 6 pts

*Our Plant recycles up to 10% post-industrial product waste in the making of each roof tile
